## BAND STORY

"

The Fuze Magazine was formed in November 7th in 2013. All the things have been started in Murmansk after travelling to North Pole like a musical escort. All participants from previous band was on the verge of collapse and was going abroad. But nine days of isolation from society made it's case: all the things we could do –writing songs. Finally has been created stuff that brought good profit subsequently. Suddenly we have realized that we need to create a new musical project. It has got the name which exists nowadays. Now we have full concert program of self-written songs in stoner/hard rock style and already gave many gigs in our district and other places.

What about meaning... every song, in our opinion performs the "bomb" by itself, which we are creating and tuning. In a particular moment we exploding this bomb on people's eyes. Small shatters gets to listeners' hearts and leaving there by the some time. In one case it's just for the moment of listening, in other –for one evening, but somebody is being injured for all their life. We are watching it and leading magazine. Our own Fuze Magazine.
